CANTURK ISCI

CONTACT INFORMATION	Department of Electrical Engineering Princeton University Princeton, NJ 08544 USA	*Phone:* +1 609 468 7744 *E-mail:* canturk@princeton.edu *Web:* http://www.princeton.edu/~canturk

RESEARCH INTERESTS

- Microprocessor power and thermal modeling and measurement
- Application power/performance phase behavior characterization, detection and prediction
- Microarchitectural and system level techniques for dynamic power and thermal management

EDUCATION

Ph.D. **Princeton University**, Princeton, NJ   Sep 2001 – Present
Electrical Engineering
Advisor: Margaret Martonosi
Thesis Title: *"Live, Runtime Workload Power Modeling, Phase Monitoring and Prediction for Adaptive Processing"*
Expected graduation date: May 2007

M.A. **Princeton University**, Princeton, NJ   Sep 2001 – May 2003
Electrical Engineering
Advisor: Margaret Martonosi

M.Sc. **University of Westminster**, London, UK   Sep 2000 – Sep 2001
VLSI System Design (*Graduated with Distinction*)
Advisors: Izzet Kale and R.C.S. Morling
Thesis Title: *"Pseudo-Random Testing of Arithmetic Circuits"*

B.Sc. **Bilkent University**, Ankara, Turkey   Sep 1996 – Jun 2000
Electrical and Electronics Engineering (*Graduated with High Honors*)

HONORS AND AWARDS

Graduate Fellowship, Princeton University, Department of Electrical Engineering	2001 – 2002
M.Sc. with Distinction, University of Westminster, Department of Electronic Systems, London, UK	2001
Millennium Scholarship, awarded by British Council to a single candidate in Turkey for postgraduate study in Britain	2000 – 2001
Ranked 33rd in National Selection Examination for Graduate Studies (LES) among approximately one hundred thousand candidates, Turkey	2000
Undergraduate Fellowship, Bilkent University, Ankara, Turkey	1996 – 2000
Ranked 45th in National University Entrance Exam among approximately 1.5 million candidates, Turkey	1996
Ranked 11th in National Physics Olympiads, Turkey	1995

PROFESSIONAL EXPERIENCE

Princeton University, Department of Electrical Engineering, Princeton, NJ

Research Assistant in Parapet Research Group   Sep 2001 – Present

Conducted research on runtime characterization of processor power and thermal behavior on real systems via performance monitoring hardware. Developed a runtime processor power estimation framework with real measurement feedback. Investigated power phase behavior of applications and developed novel methods for detecting recurrent phase behavior under real-system variability. Applied phase analysis methods to duration prediction for dynamic power management via voltage and frequency scaling. Investigated phase tracking methods based on runtime performance monitoring and application control flow signatures via dynamic instrumentation. Designed accurate online phase prediction methods on real systems and demonstrated their effective application to dynamic power management. Investigated global power management policies for chip multiprocessors.

Intel Hillsboro, Corporate Technology Group/System Technology Lab, Hillsboro, OR

Intern in Platform Capabilities Lab   Jun 2006 – Sep 2006

Worked on energy-efficient resource allocation in heterogeneous data centers. Developed architectural feature based analytical models and training based statistical methods to predict workload behavior across platforms. Implemented a phase prediction based, workload adaptive frequency scaling governor for a new multi-core server platform. Designed allocation policies that utilize across-platform workload behavior predictors for energy-efficient management of large-scale data centers.

Managers: Ram Chary/Rick Forand, *Mentor:* Eugene Gorbatov

IBM T.J. Watson Research Center, Yorktown Heights, NY

Intern in Reliability and Power Aware Microarchitectures Group   Jun 2005 – Sep 2005

Worked on global power management techniques for chip multiprocessors. Developed a trace based multiprocessor analysis tool for early evaluation of global power management policies. Explored different methods for dynamically tuning the execution of individual cores to meet chip-level power/ performance goals. Designed and evaluated per-core dynamic voltage and frequency scaling policies to meet chip-wide power budget targets.

Manager: Pradip Bose, *Mentor:* Alper Buyuktosunoglu

IBM T.J. Watson Research Center, Yorktown Heights, NY

Co-op in Reliability and Power Aware Microarchitectures Group   Jul 2004 – Dec 2004

Worked on runtime performance monitoring and phase analysis of IBM POWER4 systems. Designed long-term value and duration prediction methodologies for workload performance phase behavior with applications to dynamic voltage and frequency scaling. Contributed in automated thermal microbenchmark generation for online temperature analysis of real systems.

Manager: Pradip Bose, *Mentor:* Alper Buyuktosunoglu

ASELSAN Electronics Inc., Ankara, Turkey

Intern in Electronic Design Department   Jul 1999 – Aug 1999

Worked on the design and testing of voltage controlled oscillator systems.

Bilkent University, Ankara, Turkey

Summer Research in Electronics Engineering Department   Jun 1999 – Jul 1999

Contributed in the programming of Texas Instruments, C54x Series DSP Chip and hardware platform development for communications project.

TEACHING
EXPERIENCE

Teaching Assistant, **Princeton University,** Princeton, NJ   Spring 2004

ELE101 Computing for a Mobile World, by Prof Margaret Martonosi

An introductory class, covering the fundamentals of programming and computer systems with a specific focus on aspects of computing for mobile and handheld computers. Designed and supervised bi-weekly precept sessions. Helped prepare and grade homework assignments, graded exams and conducted office hours. Prepared, supervised and graded individual term projects.

Teaching Assistant, **Princeton University,** Princeton, NJ   Fall 2002

ELE375 Computing Structures, by Prof Margaret Martonosi

A course on how computers work and effective principles for computer systems design, where the final term project culminates in building a working computer on an FPGA. Helped prepare and grade homework assignments, graded exams and conducted office hours and precept sessions. Supervised and graded individual term projects.

ACTIVITIES	*Student Member*, IEEE	1999 – Present
	Chair of Academic Affairs, Princeton University Graduate Student Government	2005 – 2006
	Organizer of Computer Engineering Graduate Workshop (CEW), Princeton University, Department of Electrical Engineering	2002 – 2003
	Reviewer for PACT'03, HPCA'04, ISCA'04, ISLPED'04, ASPLOS'04, MICRO'04, ISLPED'05, PAC2'05, Computer Architecture Letters'05, ISPASS'06, ASPLOS'06, SC'06
